

Emergency Health Profile

Together with the American Heart Association, the American Red Cross, and Direct Relief, RapidSOS has created the Emergency Health Profile Association – a free and secure way for Americans to share critical health and medical information with 911 and first responders in the event of an emergency.

Simple Sign Up

Quick 3-step process to create your profile.

Free For All

The service is provided at no cost to individuals in the U.S.

Real-Time Data

Profile information automatically shared with the 911 center managing your emergency.

Secure

Information only shared with public safety personnel during an active 911 call.

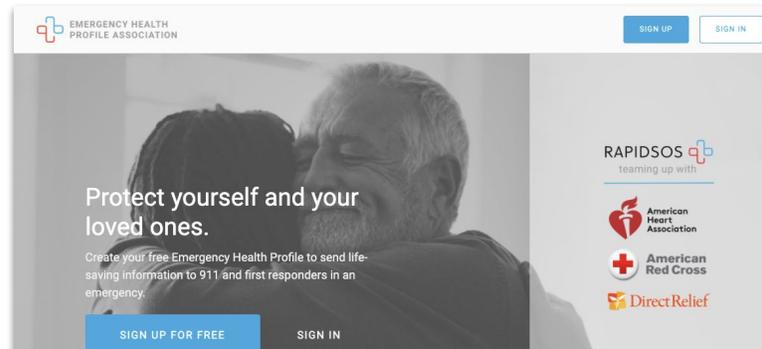

Create a free profile today!

1. Go to www.emergencyprofile.org
2. Click “Sign Up”
3. Enter your contact and health information, and save

How It Works

1. Caller dials 911 in an emergency.
2. If the caller’s phone number is associated with an Emergency Health Profile and if the local 911 center managing the emergency has access to RapidSOS, the caller’s profile information will be delivered to dispatchers.
3. First responders will arrive on-scene with knowledge of this information.

To learn more about how your data is used and protected, visit emergencyprofile.org/privacy_policy.

Why Sign Up?

In an emergency, every second counts. First responders need data to respond quickly, effectively allocate scarce resources like PPE, manpower, and medical equipment, and provide the best care for the 911 caller.

My Medical Information

Covid-19

Has experienced cough or difficulty breathing: YES (April 15, 2020)

Has experienced at least two (fever, chills, shaking, headache, sore throat, new loss of smell or taste, muscle pain): YES (April 17, 2020)

Has tested positive for COVID-19: YES (April 28, 2020)

Pre-existing conditions

Asthma

Allergies

Penicillin

Other relevant information

Asthmatic since age 5, takes albuterol
